

THE EARTHMASTER® 10 SERIES BRINGS

# NEW LIFE TO OLD SOIL

## Want to make old soil like new?

### Check out the EarthMaster® 10 Series.

With a V-Ripper that breaks through the compaction layer, EarthMaster helps roots reach the rich soil below. When your soil is as good as new, it's easier for air, water, and nutrients to get to the roots. And that increases yield potential.

### Other advantages of the new EarthMaster 10 Series:

- Extra-heavy 5/16" x 24" boron-steel disc blades maintain a sharper edge
- Shock load protection for disc gangs
- Redesigned cast pull arms that provide more strength for shanks in tough conditions

Bring new life to your soil with the EarthMaster 10 Series!
