

Rhino® Planetary Drive Diggers

The Rhino Planetary Drive Digger is built to deliver outstanding performance in many applications, including digging in soil, solid rock, and concrete.

Mount kits are available for most skid steer loaders, front-end loader buckets, backhoes, and small excavators.

Augers from 2" up to 36" diameter are available to fit your applications.

There are **three models** to choose from for hydraulic systems delivering 10-35 GPM.
