INFORMATION BULLETIN

Products affected: ALL Rhino AG Rotary Cutters and Mowers

Complaint: Confusion exists on the correct gearbox lubricant used in Rhino Mowers

Cause: Historically Rhino used “000” gear oil as factory fill and top-off oil.

Correction: Approximately 2011 85w140 gear oil was introduced as the recommended gear oil for all Rhino gearboxes. Today Rhino factory fills all gearboxes with Lucas Oil 85W140. Top off oil for the Lucas Oil or the original “000” can be any GL5 85W140 oil.

Reference Part: 00786250

Labor hours: No Labor. Information Only
